

How Dentists Increase Chair-Hour Efficiency in Sleep Apnea Cases By Working With Chiropractors

A Practical Workbook for Dentists

INTRODUCTION — The Playground

A new kid joins the school playground.
The dentist and the chiropractor both want to help.
Someone has to explain the rules of the playground.

This workbook explains:

- what the playground is (sleep apnea care)
- who sets the rules (biomechanics + scope)
- how dentists can **help more patients in less chair time**
- without turf wars, over-education, or wasted effort

(For Dentists)

You don't have to run the playground.
You just need to know where to stand.
